James Randall A. Magpantay

Curriculum Vitae

5 James St, Kingsville Executive Village, Mayamot, Antipolo City, 1871 | jamess.a.magpantay@gmail.com | 0991 586 3298
Portfolio: https://www.jamesmagpantay.com | LinkedIn: james-randall-magpantay

CAREER OBJECTIVE

A dedicated and detail-oriented Information Technology student with a strong foundation in networking, cybersecurity, and systems administration. Seeking opportunities in IT, network, and security-focused roles where I can apply hands-on technical skills to support and secure organizational infrastructure. Eager to contribute to reliable and secure technology operations while continuously growing through practical, real-world experience.

EDUCATION

Polytechnic University of the Philippines — **Manila, Philippines**
Bachelor of Science in Information Technology — *Expected Graduation, 2028*

- Relevant Coursework: Cybersecurity Fundamentals, Network Administration, Operating Systems, Data Communications and Networking, Information Management, Database Administration
- Awards / Honors: Gokongwei Brothers Foundation Scholar, President's Lister (AY 2024–2025)

FEU Roosevelt Cainta — **Cainta, Rizal, Philippines**
Science, Technology, Engineering, and Mathematics (STEM) — *Graduated, 2024*

- Awards / Honors: Top 3 Overall – Senior High School, Best in Research and Innovation, With High Honors

TECHNICAL SKILLS

Security & Governance: CIA Triad, AAA, Network Security Fundamentals, ISC2 CC Standards
Networking: IPv4/IPv6 Subnetting, VLANs, DHCP, Trunking, Routing, OSI & TCP/IP Models
Systems & Hardware: Windows 10/11, Kali Linux, VirtualBox
AI Red Teaming: Adversarial ML, Prompt Injection, Data Poisoning, Safety Filter Bypassing
Tools & Platforms: Cisco Packet Tracer, PuTTY, CyberChef, Burp Suite, Nmap, Git, GitHub
Programming: Python, Java, SQL, C, HTML, CSS
Leadership & Management: Project lifecycle management, team coordination, and technical requirements alignment

EXPERIENCE

Department of Science and Technology (DOST) — **Manila, Philippines**
Software Developer Intern — *July 2026 – September 2026*

- Remediated a verification flaw in the authentication service that accepted forged tokens, restoring signature validation
- Blocked malicious file uploads by checking file contents against its claimed type, and rejecting files with embedded scripts
- Conducted security audits for vulnerabilities, documenting CWE findings and patching insecure upload and SVG handling

Polytechnic University of the Philippines (OUS) — **Manila, Philippines**
Cybersecurity Lead (Project-Based) — *February 2026 – July 2026*

- Implemented secure authentication by enforcing strong password requirements aligned with modern security standards
- Established data handling policies to support the confidentiality, integirty, and availability of personnel information
- Implemented automated security scanning to detect vulnerabilities, insecure dependencies, and misconfigurations

Cisco NetConnect PUP — **Manila, Philippines**
Vice Chief Technology Officer - CCNA Trained — *Feb 2026 – July 2026*

- Applied CCNA concepts including VLANs, trunking, STP, and network segmentation to strengthen infrastructure security
- Configured IPv4/IPv6 addressing, subnetting, DHCP, and DNS to maintain secure and reliable network operations
- Designed, analyzed, and troubleshot network topologies in Cisco Packet Tracer, incorporating security best practices

Google Developer Groups PUP — **Manila, Philippines**
Cybersecurity Compliance Analyst — *Feb 2026 – July 2026*

- Ensures the integrity of cybersecurity learning materials distributed to a cohort of 200+ Cybersecurity Cadets
- Co-facilitated cybersecurity workshops, showcasing security tools, best practices, and core cybersecurity concepts
- Designed a CTF challenge with a vulnerability, giving participants hands-on exploitation in a controlled environment

PROJECTS & TECHNICAL INVOLVEMENT

PUP OUS - SIEM and Ticketing System — **Manila, Philippines**
Independent Developer — *March 2026*

- Achieved 100% audit log tamper detection by implementing SHA-256 hash chaining mechanism on all database writes
- Reduced security alert noise by grouping 100% of concurrent events by source IP addresses in a custom SIEM engine
- Mitigated 100% of brute-force login attempts using dynamic client-IP rate limits and automated account lockout logic

Automated Network Vulnerability & Change Scanner — **Manila, Philippines**
Independent Developer — *March 2026*

- Created a two-phase engine using Python and Nmap for rapid host discovery and targeted OS version detection
- Built a risk classification system that labels open ports by severity and provides clear security explanations
- Implemented an algorithm to flag new, closed, or modified port states by comparing scan results over time

TryHackMe - AI Odyssey CTF **International (Remote)**
AI Red Teamer *April 2026*

- Bypassed LLM safety filters via advanced prompt injection techniques to capture flags and document vulnerabilities
- Leveraged Burp Suite to exploit machine learning vulnerabilities and intercept model traffic
- Analyzed AI/ML threats, focusing on model-specific weaknesses and adversarial machine learning risks

AWS Cloud Club PUP – AI Workshop **Manila, Philippines**
AI Developer & System Architect (Project: PUP Enrollment Buddy) *Feb 2026*

- Built a RAG chatbot using LangFlow, DataStax Astra DB, & Google AI Studio to refine university processes
- Implemented prompt engineering techniques to improve response accuracy and relevance of AI outputs
- Mastered the application of Large Language Model architectures within real-world conversational interfaces

IBM Bob Dev Day – Hackathon **International (Remote)**
AI Developer & System Architect (Project: Skillet) *April 2026*

- Developed a two-repo system that fully automated dev-session mining, replacing manual extraction
- Engineered Skills Factory to autonomously mine Bob sessions using local text processing & frequency analysis
- Built a React-based dashboard for browsing skill libraries and previewing real-time session mining results

CODEKADA – Hackathon **Manila, Philippines**
Cybersecurity Lead (Project: Eely – AI Electricity Bill Scanner) *May 2026*

- Formulated data privacy protocols for AI modeling, ensuring 100% compliance in securing sensitive utility data
- Established security protocols to safeguard data integrity during AI extraction
- Streamlined UI/UX design to translate complex AI energy insights into intuitive user interactions.

Build With AI – Hackathon **Manila, Philippines**
Business Strategist (Project: GISING) – 2nd Place *April 2026*

- Won 2nd Place by building a preclinical stroke detection prototype using IoT and AI within a three-hour sprint
- Devised revenue models and growth strategies to ensure long-term sustainability for the application
- Mapped Key Partnerships and Channels to align AI medical hardware with healthcare and consumer markets

DataCamp **Manila, Philippines**
Scholar *Dec 2025 – Present*

- Integrated data literacy and security best practices into collaborative technical projects
- Gained technical proficiency in SQL for database management and Java for object-oriented programming
- Advanced from foundational to intermediate Python for complex data processing and script development

HONORS & AWARDS

- Gokongwei Brothers Foundation Scholar
- Cyber Threat Intelligence Analysis (CTIA Level III)
- Google Cybersecurity Professional – In Progress
- Certified Cybersecurity Professional (CCP) – Appkademiya
- President's Lister, Polytechnic University of the Philippines (AY 2024–2025)
- 2nd Place - Build With AI Hackathon (Project: GISING), April 2026
- Top 3 Overall - Senior High School (2024)
- With High Honors - Senior High School (2024)
- Best in Research and Innovation - Senior High School (2024)
- ISC2 Candidate
- Introduction to Cybersecurity – Cisco Networking Academy
- Introduction to Hardware and Operating Systems – IBM
- Introduction to Data Security – DataCamp
